Gruppo Euromobil

Gruppo Euromobil:
a corporate identity
world protagonist
in design and art.

It was 1972 when **Gruppo Euromobil** took its first steps and that initial craft industry gave way to an industrial enterprise that with its three brands **Euromobil** cucine, **Zalf** mobili, **Désirée** divani, is now able to furnish any area with elegance and good taste.

Total Home Design was therefore the natural next step for a group that integrates thorough technical know-how with great manufacturing skills to make complete integrated furniture systems that meet the needs of contemporary consumers and are environmentally friendly.

Ditre Italia

40 years. Art becomes history

Each product tells the story of 40 years of history, tied to artisan upholstery tradition, created by the De Marchi brothers in 1976 in San Martino di Colle Umberto.

Their workshop became an increasingly tight ship and, in response to demand for a customised product, it grew into an important manufacturing company.

In addition to its business acumen, **Ditre Italia** confirms, year on year, its aptitude for detail and its artisan skill that make its collections stand out.

The story of our past is what distinguishes our today.

Our History....

The business was started up in 1963 with a production capacity of less than 20,000 parcels and about 200 accounts.

It has always been based on the same obsessive pursuit of quality and daily passion for our work.

There's just a difference between those days and today: the growth of our company's size and experience, even though our approach to business remains the same.

We are still determined in proposing our philosophy: experiencing the beauty together with functionality and comfort, always innovating our choices.

MIDJ[®] in Italy

In Italy: Cordovado, Italy

Italy does not just define a place of production, but goes beyond: for us, it indicates a way of thinking and living, that we embraced in designing and innovating the idea of furniture since 1987.

Not just **Made in Italy**, but a perfect synergy between hand - craft modeling, creativity and technology, that makes our working method the added value in each product.

“There is something about giving
everything to your profession.
In Italian, an obsession is not necessarily negative.
It’s the art of putting all your energy into one thing;
It’s the art of transforming even what you eat
for lunch into architecture”.
